PROJECT DESCRIPTION:

The Pryor Creek Oklahoma data Center Project is a 4-story facility built to house a world renowned tech company. One of the largest data centers in the world, this construction project successfully utilized 342,591 lbs. of Telling premium metal framing including: Non-Structural 20EQ Studs & Track, Structural Studs & Track, Shaftwall, CT Studs & J Track, Slotted Track, Z Furring, Right Angle and Flat Strap. The total investment for this project was 600 million dollars and will increase local employment by over 500 people.

**Innovative, Responsive Solutions for
All Your Metal Framing Needs**
